Bidding Instructions

Bidding in this sale can be an interesting, enjoyable, and numismatically rewarding experience. If you're an old-time bidder with us, you may find some of the following comments will increase your bidding success. If this is your first sale, then we particularly recommend that you read this commentary. The paragraphs are numbered for reference in the event that you wish to ask further questions about any aspect. Have a question? You get *personal service* at Bowers and Ruddy Galleries. Please feel free to write or call and a member of our Auction Department staff will gladly help you.

1. Read the Terms of Sale in the front of the catalogue. Note that a 10% buyer's premium will be added to all successful bids.

2. Mail your bid sheet as early as possible. This is particularly important if you're a new bidder, for it takes us time to check your references. Also, this assures that your bid sheet will be received before the sale. A bid sheet mailed a few days before the sale might not reach us until a week later—at which time the coins will have all been sold to others!

3. We've found it best to use a *work sheet* to compile bids. In this way you can check back and forth throughout the catalogue, make changes and revisions, and so on. Then when you've decided on your final bids, enter them on the bid sheet. Try your best to keep the bid sheet neat and clearly understandable, listing the lots in order.

4. If you are a new bidder, send along references and a 25% deposit.

5. Be prepared to pay in full for all lots for which your bids are successful. Don't bid more than you want to pay! Review your financial circumstances carefully before bidding. If you are awarded lots you are legally bound to pay for them.

6. Please keep current price levels in mind when bidding. While high and low prices sometimes occur, most items sell within market ranges. If a popular coin sells for \$500 on the retail market, chances are not good that a bid of, say, less than \$400 will win it. On the other hand, chances are excellent that a bid in the \$500 to \$600 range will be a winner. There is no harm in bargain hunting, but as your time is valuable (and so is ours), it is most productive if you keep current values in mind while bidding!

7. Auction invoices are due upon receipt unless *prior credit* arrangements have been made with us.

8. You may pay for your auction lots with Visa, Master Charge, or American Express charge cards.

9. Be sure to sign your bid sheet.

10. Ink is best for writing bids. Pencil tends to blur.

11. If bid changes are necessary, do not write over any figures. Instead, cross them out completely and re-enter the bids.

12. Put your telephone number on the bid sheet. In this way we can call you if there is any question about a bid.

13. Submit bids in even dollar amounts. Cents and fractional dollar amounts will be ignored.

14. Check your bid sheet carefully. You will be responsible for any bids on wrong lots or for the wrong amounts. Please, please be careful!

15. Don't forget to take advantage, if you wish, of the optional 10% or 20% increase to really help your chances of being a successful bidder.

16. If you wish to limit your total expenditure, please write MAXIMUM EXPENDITURE \$_____ and the amount at the top of your bid sheet. You can then submit bids for amounts up to *four times* the amount of the maximum expenditure. This is a *personal service* and a Bowers and Ruddy customer representative will personally attend to your bid sheet by bidding from the auction floor, buying lots for your account until your authorized expenditure is reached. Due to the bookkeeping involved, this service is offered only to bidders with maximum expenditures of \$1000 or more. MAXIMUM EXPENDITURE and "ONE LOT ONLY" bidding cannot be combined.

17. Up to five lots may be grouped with brackets for a "ONE LOT ONLY" purchase, if you wish to purchase only one example of a coin of which several examples appear in the sale. Such lots should be bracketed with the notation "ONE LOT ONLY" appearing.

18. Lots may be inspected by mail prior to the auction. Please write or call for further information.

19. Our Auction Department is here to serve your needs. We really appreciate your interest and business and will do anything we can to make auction bidding by mail more enjoyable for you. We look forward to receiving your bids.

20. If you want to *sell* your coins by auction, call or write for our free, informative brochure, *How to Sell Your Coins for the Best Price*.

Instructions to Bidders

Please Read Before Bidding

TERMS OF SALE

1. All bids are to be per lot; no lots will be broken. In the event of identical bids on the same lot, the lot will be awarded to the first bid received. In the event of a dispute during floor bidding the auctioneer may at his discretion immediately put the lot up for sale again.

2. A buyer's charge of 10% on each individual lot will be added to all purchases made by all bidders and will be based upon the total amount of the final bid. This buyer's charge will be added to all invoices.

3. All sales are strictly for cash payable in U.S. dollars drawn on a U.S. bank. Invoices must be paid within 5 days of receipt. Shipping, handling, postage and registration charges will be added for lots delivered by mail. All bidders not furnishing resale permits will be responsible for sales tax as required under the law for lots delivered in the state of California; lots picked up in Iowa will be subject to a 3% sales tax. Any account not paid within the prescribed terms as outlined above will be billed additional interest and collection charges at the rate of 1 1/2 % per month.

4. Bidders not known to us must furnish satisfactory references and/or a deposit equal to 25% of the bids submitted (which will be applied to purchases; any difference will be billed; any overage will be refunded). We reserve the right to obtain payment in full before delivery of the lots from any successful bidder even if satisfactory references are submitted. Title does not pass until lots are paid for in full.

5. All lots must be paid in full prior to shipment, unless previous credit arrangements have been specifically agreed to by Bowers & Ruddy. Please contact our credit department in advance if you have any questions regarding your purchase.

6. No "buy" or unlimited bids will be accepted. No bids will be accepted from minors. The auctioneer and/or the cataloguer reserves the right to refuse any bid which, in our opinion, is not made in good faith or does not qualify by reason of credit.

7. All items are guaranteed genuine.

8. We cannot be responsible for your errors in bidding, so check your bid sheet carefully. Please bid in even dollar amounts. All bids not in even dollar figures, including those increased by 10% to 20% (see our special service on the bid sheet), will be rounded off to the lower whole dollar amount. All bid sheets must be signed.

9. Auction sales are not approval sales. Any lot may be examined before bidding. No lot may be returned by a mail bidder without our permission in writing. Requests to return coins must be made in writing within three days of receipt of the coins. Late remittance for purchases, however, is cause to negate this privilege.

10. No lots may be returned for any reason by floor buyers (including those acting as agents for others). All floor sales are final.

11. Any claims involving errors in the catalogue or for other reasons must be made within three days of receipt of the coins. Bowers and Ruddy Galleries acts as agents for the various consignors. For this reason, no claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the bidder and the consignor, without involvement or responsibility of Bowers and Ruddy Galleries and/or the cataloguers. Bowers and Ruddy Galleries reserves the right to include its own material in any auction. In the event of a typographical error or attribution error or other error, the cataloguer reserves the right to withdraw any item from the sale without notice, or, if the error is discovered at a later date, to refund the buyer's money without further obligation. By placing a bid in this sale you agree that this transaction and these terms shall be construed in accordance with the laws of the state of California. Any controversy or claim arising out of or relating to this sale shall be settled by binding arbitration in Los Angeles, California, in accordance with the rules of the American Arbitration Association, and judgment upon the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof.

Introduction

Welcome to the "Harbor Collection" which offers United States, World, and ancient material from many consignors. This presentation is unusual for Bowers and Ruddy because in a single catalogue there are two separate auctions to be held one week apart. We have split the presentation so that the United States section of this sale may be offered just prior to the Long Beach Numismatic Convention, a show of predominantly United States material, and the world and ancient section may be offered at the C.O.I.N. Show for which Bowers and Ruddy is the official auctioneer.

Many exciting pieces are contained in the United States material. Comprising some of the highlights are four 1793 cents, including a "Chain Ameri" piece; large cents, featuring a Condition Census 1803; and a broad selection of Morgan dollars, including a complete set (with the exception of the 1895), mostly in Uncirculated condition. The gold section consists of a full set of commemorative gold, featuring a five-piece Panama Pacific set of 1915 containing both \$50 pieces.

All of these pieces will be offered individually giving the serious collector a chance to fill out his collection of commemorative gold. Another interesting gold offering is not one, but a pair, of Uncirculated 1806 half eagles!

Several interesting patterns are highlighted by a Judd-45 in silver which is a "mule of the obverse of the quarter with the reverse of the cent of the period struck over a quarter dollar dated 1860." This piece brought \$1400 in a 1972 Bowers and Ruddy auction. It is nice to see "an old friend" again! In addition, Judd-67 has returned to Bowers and Ruddy for auction. A similar piece sold for \$6,200 in the Sieck Collection sale in July, 1981. If you are interested in the latest update on pattern prices and pedigrees, the 7th edition of "United States Pattern, Experimental and Trial Pieces" is available now from Bowers and Ruddy for \$19.95 postpaid.

The key piece in the Americana offering in this sale is the James Madison Indian peace medal which is a 76 millimeter silver medal pedigreed to 1871. Indian peace medals are becoming more prevalent in our auctions and are receiving a growing interest from collectors. Perhaps you should learn more about this series. It is truly fascinating.

Ancient coins and world material are presented in the second half of the catalogue. Gold ancient coins are highlighted by an attractive Kyzikos electrum stater and a very nice collection of Byzantine gold. Silver ancient coins find several attractive Greek silver pieces including an Agrigentum tetradrachm. A nice offering of Roman republic and empire silver and bronze follow the Greek silver featuring an exceptional denarius of L. Hostilius Saserna.

Both sections of world material, gold and silver, have some very interesting highlights. There is a Proof 1908 100 coronas Austrian piece from the 60th year of Franz Joseph's reign. Czechoslovakia is represented by a 1931 ten ducats specimen, and Egyptian gold features a 1938 500 piastres. Peruvian gold coinage is represented by a 1712 Lima mint 8 escudos piece in exceptional condition.

Foreign silver offers a good selection of medieval coins, especially those from England. The Canadian listing includes a rare 1921 five-cent silver piece and two 1947 "Maple Leaf, curled seven" 50-cent pieces. British material is headed by a 1615 Cromwell half crown and a Choice 1853 "Gothic" crown. Also found in this broad variety of numismatic material is a 1935 "Waitangi" Proof set from New Zealand and a Proof 1892 crown with "double shaft" wagon from South Africa. The Swiss shooting talers are also very nice.

Finally, we are proud to offer one of the largest collections of box talers and medals ever to be offered for sale in this country. They are the collection of F. William Kuethe, Jr. and include over 200 pieces. The American pieces are offered under the Americana section and the foreign pieces are offered under foreign medals. This is an excellent opportunity for you to acquire some fascinating pieces of numismatic history from this broad selection of box talers.

We look forward to welcoming you to Los Angeles to attend either or both of these sales. We feel that now is an excellent time for interested collectors and numismatists to build their collections at prices that three years from now may seem very low. If you would like any further information, please feel free to give us a call.

Sincerely,

William D. Hawfield, Jr.
President

Colonials

- 201 **1723 Rosa Americana penny**. Period after REX, no period after date, large heavy ends to scroll. Cross atop crown tipped sharply to left. **About Uncirculated**, lustrous tan-brown surfaces, glossy from application of lanolin or something similar, heavy die flow lines in fields. A scarce item; Garrett had an EF which brought \$800 and an AU at \$1800.
- 202 1723 Rosa Americana twopence. Nelson-14. Period after REX, no period after date, large scroll ends. VF-20, dark with some typical and nonserious scattered porosity. Scarce and very underrated.

- 203 **1723/2 Wood's Hibernia halfpenny**. The very scarce overdate. Large 3, period before H, second harpstring very heavy. **Ex. Fine**, glossy chocolate brown. Only the single large 3 overdate die out of more than 150 varieties of the regular 1723 halfpenny. About as fine as is obtainable, we've never seen an Unc. of either overdate.

- 204 1724 Wood's Hibernia halfpenny. Period after date, crosslet 4. Scarce, and reportedly only the single die of this type. **Ex. Fine**, glossy medium brown. In general 1724 issues of both denominations are very scarce and underrated compared to their 1723 counterparts.
- 205 1724 Wood's Hibernia halfpenny. *The extremely rare variety with legend continuous over head.* Taxay C-358. Just **Abt. Good**, sharpness of perhaps **Good** but dark and porous in fields. Only a single auction record: Lot 18 of our January, 1981 sale, a **Fine** which brought a healthy \$385.00; see the long technical note given there.

- 206 1766 Pitt halfpenny. **Copper. Very Fine**, warm chocolate brown, smooth, attractive and without defects. A scarce, popular and very historic item.

- 207 1783 Chalmers shilling. The short worm variety. **Very Good or better overall**, many details at least **Fine**, others weaker from the almost diagnostic die failure at the birds and below. Light toning. Scarce and much undervalued.

- 208 1773 Virginia halfpenny. Period after GEORGIUS; 7 harpstrings. **Steel gray and faded rose Uncirculated**.
- 209 1788 Vermont copper. RR-20. **VG** obverse, reverse weak in center from die failure; also a 1788 GEORGIUS III REX / INDE ET LIB mule, the Connecticut reverse, Miller D. Sharpness better than **VG** where struck up, very weak at borders, especially left obverse and reverse, light old porosity. Scarce issue. (Total: 2 pieces)

- 210 1787 Fugio cent. Newman 8-X, clashed dies. **Abt. Uncirculated, choice**, dark brown with much original mint surface. Tiny clip at 8 o'clock, as made, planchet otherwise perfect with none of the usual laminations and splits. A smooth "black beauty."

U.S. Half Cents

- 211 1806 Large 6, stemless. VF-20; 1828, 13 stars, EF-40; 1851 EF-40. First two cleaned, 1806 now more or less completely retoned, but the 1828 has a long way to go. (Total: 3 pieces)
- 212 1807 Choice EF-45, olive and gold-tan, attractive and quite scarce.
- 213 1828 13 stars. EF-40 with a few light obverse scratches.

- 218 1835 AU-50 with a light stain on the reverse.

U.S. Large Cents

- 220 1793 Chain cent. **AMERI. reverse. S-1. VF-20 overall**, reverse sharper than obverse, as always. Some rather minor tooling on some of the hair curls, profile more crudely strengthened, especially at the throat. Cleaned long ago, now retoned a brassy olive with darker patina on edges. Always in tremendous demand both by cent collectors and type collectors.

See Color Photo

- 221 1793 Wreath cent. **S-9. Close to EF-40 in sharpness**, rusty steel surfaces with fine porosity in fields, mostly worn smooth on devices. Completely defect-free and an attractive example of this classic item.

- 222 1793 Wreath cent. S-11b. Lettered edge, two leaves after DOLLAR. VF-20 or so, two faint scratches in left obverse field, several small rim bumps and lightly porous, though it appears to be smooth without the aid of a glass.
- 223 1793 Wreath. S-11b. Lettered edge, as above. Abt. Good obverse, reverse worn nearly smooth and can only be called Poor. Defect-free filler.

- 224 1795 Lettered edge. S-74. Fine-12, dark steel, few old light obverse scratches. Reverse is bolder than the obverse. Very scarce.

Third Finest 1803 Large Fraction, S-257

- 227 1803 S-257. Large fraction with very short bar. Choice AU-55, smooth chestnut brown with excellent reflective surfaces, lightly clashed dies. A Condition Census item; Sheldon lists only two Uncirculateds, the "70" in the list undoubtedly the mint red Beckwith coin (Lot 30), while the "60" is the well-known T. James Clarke piece, last sold in the Naftzger collection, Lot 575. From there the Census drops to 55-45-45-40 making this tied for third finest. A cleaned piece which was called Uncirculated was sold at auction in 1978, but we did not examine it, and do not know whether it is any finer than the present piece.
- 228 1803 Small fraction. Sharpness of EF-40 but harshly cleaned, now retoning a somewhat unusual blue and red.
- 229 1814 Plain 4. Choice VF-30, smooth dark brown, few old light scratches in left obverse field, but a pleasing cent with a nearly EF reverse.

- 230 1817 MS-60, lustrous sea-green Uncirculated, softly struck in places, usual scattered keg-marks of moderate depth, two or three light stains. Date spaced 1 8 17.

- 233 1850 MS-63, Select red and brown Uncirculated, the two colors mottled in the usual way: brown in the fields and on devices, red in the protected areas.

- 235 1853 MS-63, Select Uncirculated, brown with a faint hint of gold. Scattered keg-marks.
- 236 1853 MS-60, steel gray Uncirculated, very sharp impression about the rims for one of these, but little in the way of mint lustre.

Unique 1818 Quarter/Cent Mule

See Color Photo

- 974 **1818 Mule of obverse of quarter dollar with reverse of cent.** Struck over an 1860 Liberty seated quarter. Listed as Judd-45, but obviously a restrike made outside of the mint, though with genuine mint dies. Ex Wiggin (1862), Lot 270; Parmalee (1890), Lot 19, Wooding, T. James Clarke, James Welch, sold to the present consignor by Bowers and Ruddy in 1975 for \$4400. **Prooflike Uncirculated**, original lavender and pale greenish silver tones. Should be of wide interest for collectors of quarters, cents, or early experimental pieces. **Absolutely unique and known so since 1862.**

(Cont. on next page)

Note: The 1860 date on the undertype shows faintly at TES in STATES (turn the coin upside down). Bolder traces of the shield and parts of the eagle on the original coin show at the face and neck of Liberty. Obviously this was made as a curiosity piece using two genuine dies that had been discarded by the mint as scrap. The obverse is that of the 1818 quarter, Browning-2 (narrow denticles, wide date with second 1 low, 13th star recut, 1st star points to second drapery fold). The familiar arc break seen on the latest states of B-2 is fully in evidence here, extending down through the top three stars on the right, and turning to the rim at the 10th star. Rust on the die is much in evidence, especially about the rims, and there are a few signs of mishandling, but the die was clearly never defaced. On the shoulder clasp is engraved what appears to be a script M; this possibly refers to Joseph Mickley who is most likely to have made this piece, along with such other better known restrikes as the 1804, 1810 and 1823 cents, and the 1811 half cent with the reverse of 1802, among others.

The reverse die is evidently the same as that on the 1818 cent, Newcomb-8, however it had rusted to near illegibility and had to be extensively reworked and strengthened by hand. The re-engraving job is crude and very noticeable, especially on ONE CENT and the word STATES. Note that the F in OF has been changed to an E! In addition, the coin itself received at least two impressions from this reverse die with a shift of nearly half a letter space between two of them. Much of the dentilation on the reverse die also shows crude strengthening.

As noted above, the piece is struck using an 1860 Liberty seated quarter as a planchet. But a close fitting plain edge collar was used, probably to alleviate stress on the aged and much-crystallized dies, and therefore the edge reeding on the original 1860 quarter is partly obliterated from radial expansion against the rigid, plain collar. The piece was definitely struck between 1860 and 1862, as it was listed in the 1862 Wiggin sale. This time period coincides perfectly with Mickley's other restriking activities; reasons why only a single piece of this mule was struck, or why Mickley "signed" this one with a script M cannot even be guessed at. However one guesses that Mickley used a cent reverse die only because no quarter dollar reverse was available, and struck the piece in silver because the cent reverse would probably make the piece immune from confiscation under the then admittedly liberal counterfeiting laws. The value of this piece today is of course speculative, but as a unique variety it should be worth more than the 1811 half cent restrike with the reverse of 1802, a specimen of which sold in Stack's March, 1975 sale, Lot 844 at \$4750.

Rare Gobrecht Pattern Gold Dollar

- 975 **1836 Gold dollar.** Liberty cap surrounded by rays; closed wreath with date below. Judd-67. Plain edge. Dies aligned coin-wise. Reddish gold typical of copper alloy. **Brilliant Proof**, light signs of handling, faint hairlines, three scratches across reverse, few tiny rim nicks. Most of the original Proof surface is intact. The flan is slightly buckled, as made, evidently this is one of the restrikes from original dies made about 1860. (Restrikes were also made from these dies about 1844, but these are from bullion alloyed with silver, not copper, and have the dies aligned medal-wise instead of coin-wise. The restrikes of 1860 use copper-alloyed gold with the dies aligned as on originals and are difficult to distinguish from the latter, but one is known struck over an 1859 regular U. S. gold dollar; (this has a reeded edge, of course). Intensely popular as the first U. S. pattern struck in gold, the first U. S. gold dollar, and one of the few gold patterns not struck in large quantities in copper or other base metals. Also the design is unique in the gold series. Recent auction records for J-67 include \$17,000 for the Garrett piece in March, 1980, and another in a NERCA auction at \$21,000 in April, 1980, the peak in the last coin market cycle. The Garrett piece was resold as Lot 2428 of the 1981 ANA sale, and it managed to bring only \$6200, which is what the piece is really worth, anyway. We note that this piece was listed in the old 6th edition of Judd at \$3500 making \$6000 to \$8000 as a reasonable value today. In a custom white plastic holder.

Note: Dies by Christian Gobrecht who interrupted his work on the second obverse of the silver dollar to complete these dies. Pieces were struck before March 14, 1836, as a letter of that date from the Director to the Secretary of the Treasury enclosed a specimen in gold. The obverse design with a Liberty Cap surrounded by rays was directly copied from the series of silver coins struck by the Mexican

Republic starting in 1823. Gobrecht had used the same design a couple of months earlier on his mint medals dated Feb. 22 and March 23, 1836 for the first steam coinage at Philadelphia (Julian MT-20, 21). Nearly the same designs (both obverse and reverse) were used again in 1850 on a silver trime pattern (Judd-125), with the date moved to the obverse.

Extremely Rare Dateless Indian Cent

See Color Photo

- 976 (1858) Indian cent design from the die before the date was added, small center dot in ear; broad shield atop an oak wreath with a heavy center dot. Judd-216. Copper-nickel, extra broad planchet. Dies aligned medal fashion. Listed as R-8, only two or three pieces known. Gold and olive Proof, parts of denticles not fully struck up, exactly as on 1850-1857 large cents which also use dies much smaller than the planchets. Couple of very minor rim dents. No recent auction records that we are aware of, none in Garrett or the 1981 ANA sale or the Dr. Crouch sale of 1977. Judd cites a 1974 private sale at \$1000 and A. Kosoff sold the Dr. Judd example in 1962. A real prize and possibly the chance of a lifetime!

Note: The obverse hub included everything but the date. A direct impression from this hub (incuse) exists; it is listed as J-264 under 1860 on the authority of Adams and Woodin who state it was struck in 1860 in conjunction with Dr. Barclay's proposals. This statement seems dubious to us however, and it more properly belongs under 1858. Taxay lists the present pattern, Judd-216 as his EP-245 with two specimens cited: The Boyd-Farouk piece and a specimen once owned by Maj. Lennox Lohr (however it is absent in the list of the Lohr Collection prepared by Empire Coin Co. over twenty years ago).

See Color Photo

- 977 **1863 Eagle.** Judd-352 in copper. Choice mahogany Proof. Only R-3 which for a pattern means it is common, but very popular since the gold specimen is unique (the Garrett piece). Evidently the same reverse die as first used on the similar 1861 eagles, Judd 286 and 287. Some evidence exists suggesting that the "motto" eagles of both types in copper were vended through the mint as part of two-piece sets with the corresponding half dollars of each year. Current value is about \$1000 on this item.

- 978 **1869 Half dollar.** Judd-748. Standard silver series. Struck in silver, reeded edge. Bluish gold toned Proof, few faint hairline scratches. Not rare in any sense but popular as an affordable pattern silver half dollar. Current value about \$500 to \$600, though it has an inflated 1980 auction record of \$2400.

James Madison Indian Peace Medal

See Color Photo

- 1000 **James Madison Peace medal, silver 76 mm.** Weight 2373 grains. Julian IP-5. With original round silver suspension loop.

This Indian Peace medal was the first solid silver medal produced by the Mint, and engraved by the well-known engraver John Reich, under the supervision of John Vaughn, a prominent Philadelphia merchant and patron of the arts. The latter, in turn, acted as an agent for the War Department. Although Madison was inaugurated in March, 1809, the medals were not finally finished until December, 1814. They were struck in three sizes, 76, 62, and 51mm. for Indians of varying importance.

No records exist of the exact number of these struck, but probably about 100 each of them were made, but apparently the 51mm. size is rarest of the series. Belden shows a 76mm. copy in at least Extremely Fine, and we know of at least two 76mm. in private collections. The Garrett Collection had a 62mm. Madison, but no other size. The plate coin in Julian is a well worn Fine, without loop, almost identical to the present specimen.

The present specimen was acquired from a midwestern Indian tribe by the consignor's grandfather in 1871. The chief who owned the medal is identified in contemporary writing as "Shaw-wah-nequa-na of Kan-ga-chu-ing", Michigan. The original note on about a 3x5 piece of lined paper is included with the lot, written in 1871.

The medal is the only one so far noted with the original loop. It has considerable wear from contemporary usage. Almost identical in grade to the Julian plate which is identified as belonging to the ANS. A rare opportunity for the Peace medal collector.
Grades Fine. (\$4500-5500)

The F. William Kuethe, Jr. Collection of Box Coins and Medals

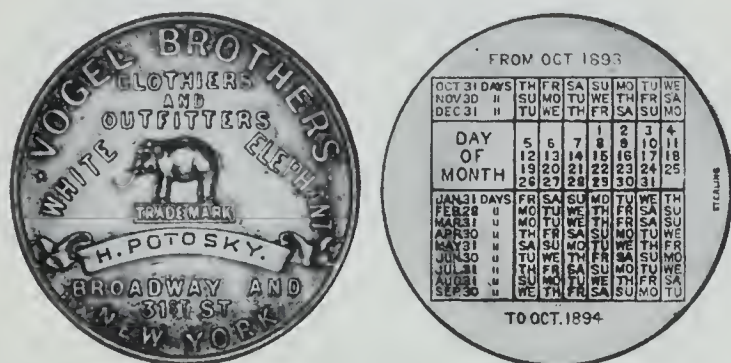

Collecting coins that have been converted into "box dollars" has long been a popular adjunct to numismatics, especially in Europe. The production of these unusual numismatic products dates to the very early 17th century, undoubtedly in Augsburg (Germany). Starting in the mid nineteenth century, box medals (wholly created from start as boxes) have been produced in Germany, Great Britain and the United States.

Bowers & Ruddy is proud to offer the largest collection of these box coins and medals ever sold in the United States. The United States series is offered here with the Americana section, while the extensive foreign section will be sold under Foreign Medals. A single introduction for both series of this same collection will be given here under Americana.

The literature on box coins and medals is extremely sparse — perhaps this extensive listing can form the basis of an update. To our knowledge, the only extensive treatment of box dollars was published in German by Herman Clauss of Schwabach, which appeared in *Mittheilungen der Bayerischen Numismatischen Gesellschaft* in 1913. He listed 78 different pieces from his own collection, and various German Museums. The present offering of over 200 pieces considerably expands the base of box dollars. We will extract liberally from Clauss's introduction for this background information.

The so-called box dollar occupies a special spot in the field of numismatics. Under this name, we refer to a dollar shaped, coin-like figure which can be opened and closed like the present-day coin medallion (referring to 1913) — often by means of a screw thread, and which is intended to contain inscriptions, pictures or even another small coin of a definite purpose into its hollow. Usually a number of pictures are found in it, so that the box dollar represents an amalgamation of coin and imagery, half a product of metal technology and half that of graphics and iconics, of miniature painting, an object of interest to both coin lovers and art historians. They are not only modeled externally on real coins, but also largely even produced from real coins. They were never intended to be legal tender — in common with ordinary medals, since it was never issued by a government or other official body, or distributed by one. Only in the most unusual cases were they prepared by their direct commission, usually being a product of private industry, an object of commercial speculation or show-piece for fans of higher or lower standing.

The fact that the box dollar even today (referring to 1913, but true today) is a guest rather than a real believer, is undoubtedly connected with the above facts. This is also the probable explanation for the surprising fact that it has never been favored by any special research. There is no special literature on it, and even great and otherwise basic orientational works on the various branches of numismatics have little or nothing to say about the box dollar, especially about its origin and developmental history.

- 1027 Vogel Bros., New York silver presentation calendar, 1894, engraved to H. Potosky. These sterling presentation calendars must have been Christmas presents for special customers, but a short lived precedent. Fuld N.VO.1 (the identical piece). About Uncirculated and very rare. (\$100-125)

Unusual Love coin, on \$2 Newfoundland gold coin.

- 1028 Although love coins, especially on 10c seated Liberty coins are not rare, they rarely appear on gold coins. This specimen, on a \$2 Newfoundland coin, is the **first ever seen on that denomination**. The reverse initials are apparently HEB, artistically engraved, with a fused loop. It grades Extremely Fine and is quite attractive. (\$100-125)

Clauss concludes that whether the origin of box dollars is of German or other foreign origin is perhaps an open question. However, German coin history shows the beginning of box dollars as early as the start of the 16th century, and thus approaches the time when medals per se first became popular in Germany. According to Clauss, the prototype of the box dollar is to be found in a Wurtemberg royal penny from the time of Duke Ludwig (reigned 1568-1593); it contained an inside decoration and on one of its metal plates was engraved the year 1587. If it were to be assumed from this, that the coinage master of this dollar, the famous medal maker and silversmith Valentine Maler, is also the creator of the inside decoration, then a Nuremberg master would be recognized as the father of the box dollar in its first form.

It should be stated that some doubt can be cast on Nuremberg as the origin of the box dollar, as the city took no position, let alone one of leadership, since Augsburg took over the mass production of Box dollars from the beginning of the 17th century and was held unbroken for almost 200 years. Augsburg masters created the box dollars, copperplate engravers created the first of the picture inlays, and laid the foundation for multilateral application. In the workshops of Augsburg, especially that of Abraham Remshard, new variations of the box dollar spread throughout Germany. Only very late, perhaps with the appearance of Stettner toward the beginning of the 19th century, did the imperial city of Lech lose its long held monopoly. Among the 78 box pieces listed by Clauss, some 50-55 are attributable to Augsburg.

The technical preparation of box dollars from their origin was as follows. A real dollar was taken, its back abraded or sawn off, and the metallic nucleus was then hollowed out until it became a half capsule. A second half capsule, either prepared separately or produced in the same manner as the first from a *different* coin of the same size, was added to it by the silver turner. In the Nordling city museum is a box dollar which still bears testimony to this initial process, since its front cover was made from an Augsburg dollar of 1628, while the back cover possesses no coin at all, but was made evidently by hand and consists of an original flat capsule successively decorated with only engraved geometrical ornaments. If the Nordling piece is a prototype, certainly shortly thereafter, most box dollars used a coin for both the front and the back. Of course, it is obvious, that the artisans became quite liberal on the selection of a coin for both the front and back — many of the early European box dollars have strange and often misleading combinations of coins in a single box unit. In a way this presents a distinct challenge to the numismatist, to unravel the actual coin types used. (We have used great care in the foreign section to fully identify both the obverse and reverse of the coins used, mostly dollars attributed by Davenport listings.)

From the 18th century on the custom of working current coins into box dollars began to fade, and ceased in Germany shortly thereafter. It should be noted that in the 1870's, the conversion of U. S. trade dollars into box dollars became very popular in the United States followed shortly by box medals. Likewise in Germany and Great Britain Box medals became quite popular starting about 1850.

F. William Kuethe, Jr. who formed the collection being sold herewith collected box coins and medals for over 20 years, scouring the European continent for specimens. Mr. Kuethe included many related pieces in his collection, such as the recent three part medals made in the United States and Sweden, hollowed coins made into folding knives, and a wide range of coin "stack" boxes which will be described below. It is a great privilege for Bowers & Ruddy to offer this unique collection to the collecting fraternity.

- 1029 **Twenty Dollar gold piece, "1873-S" beautifully crafted box coin.** First, let us reemphasize that this piece was made from two *different* coins, and the date of the coin, used for the reverse may or may not be the date of the coin used for the obverse, hence all dates in the U. S. coins will be given in quotes. This piece is of exceptional workmanship, dating from about 1880 to 1890. Instead of a pressure point on the top of the reverse for release, this piece has a pin inserted in the border at 12 o'clock. When pressed, it releases a spring that pops the reverse. A high quality product, crafted carefully and extremely rare.
 Grades Extremely Fine to About Uncirculated. (\$800-1000)

Brass, Extremely Fine. (\$65-90)

- 1057 Dollar size medal box, showing Columbus, Eglit 92. This is the most common of the all rare Columbian boxes, with a standard push-back swivel. It is very near silver dollar size, reeded edge, and the inside is empty. On the obverse, are shields of Spain and the United States, not appearing on the following unlisted medal. Rare and popular. Silver, marked Sterling on the inside, and Extremely Fine. (\$120-150)

The F. William Kuethe, Jr. Box Taler and Medal Collection

The following lots of box talers and medals represent the most important holding of these pieces ever sold in the United States. The United States box coins are being sold in the U. S. sessions under Americana. The introduction to that series is equally applicable to the foreign section offered in the next hundred or so lots. We hope you the collector can appreciate the magnificent efforts of Mr. Kuethe in assembling this fine and unique collection.

On the crown size pieces, most are attributable to Davenport. However, as mentioned in the introduction under Americana, many of the boxes are made from different coins for the obverse and reverse — in this case the different Davenport numbers are given for the front and back.
